Available Full-Time (Online Degree) – Open to Remote, Hybrid and On-site Internships – Available Immediately

PROFESSIONAL SUMMARY

BCA (AI & Data Science) student and aspiring Data Analyst, strongest in SQL (PostgreSQL) and Power BI data modelling with DAX, with 3 end-to-end projects on 100,000+ records. Seeking a full-time Data Analyst, Power BI or MIS internship.

TECHNICAL SKILLS

SQL (PostgreSQL): JOINs, Subqueries, CASE WHEN, GROUP BY / HAVING, Aggregate & Date Functions, Views

Power BI: Data Modelling & Relationships, DAX (Measures, Calculated Columns, CALCULATE, DIVIDE), Date Tables, Power Query

Excel: Pivot Tables, XLOOKUP, Data Cleaning & Validation

Domain: E-commerce & Retail KPIs – Revenue, Profit Margin, Average Order Value, Discount Impact, Late Delivery %

PROJECTS

E-Commerce Sales & Delivery Analysis | *PostgreSQL, Power BI* | View project

- Loaded 5 relational tables of real e-commerce data (99K+ orders, 112K+ order items) into PostgreSQL and wrote SQL with JOINs, GROUP BY and CASE WHEN to analyse revenue, categories, states and delivery performance.
- Built a SQL view with calculated delivery status and delivery days, used as the single source for a 2-page Power BI dashboard; totals (R$13.2M revenue, 96K orders) matched SQL exactly.
- Found that São Paulo drives 38% of revenue, 8.1% of orders arrive late, and northern states wait 25+ days versus under 10 in São Paulo, with late deliveries peaking at 21% in March 2018.
- Recommended regional warehouses or local carrier partners for the north and northeast, and extra delivery capacity before peak periods such as Black Friday.

Sales Performance & Profit Analysis | *Excel, Power BI* | View project

- Cleaned and validated a 9,994-row retail dataset in Excel (duplicates, blanks, pivot checks) before modelling it in Power BI.
- Built a date table and DAX measures for Sales, Profit, Profit Margin %, Orders and Total Loss, plus discount bands to measure their effect on profit.
- Found that discounts above 20% turn profit into loss (margin falls to -77% above 40%) and Furniture earns only $18K profit on $742K sales.
- Recommended capping discounts at 20% and reviewing pricing for Tables and Bookcases, the biggest loss-makers.

HR Employee Attrition Analysis | *Power BI, DAX* | View project

- Analysed 1,470 employee records to measure a 16.1% attrition rate, using an attrition-rate measure so groups of different sizes could be compared fairly.
- Found that Sales Representatives (~40%), employees aged 18–25 (36%) and first-year employees (35%) leave most, and employees on low salaries leave at 29% versus 11–12% on medium and high salaries.
- Recommended focusing retention on new and lower-paid staff, especially in Sales, through stronger onboarding and pay reviews.

EDUCATION

Bachelor of Computer Applications (BCA) – AI & Data Science | 2nd Year, Currently Pursuing (Online)
Yenepoya University | Expected Graduation: 2028

Data Analyst Course | G-TEC Computer Education

CERTIFICATIONS

Google Data Analytics Professional Certificate | Google via Coursera

Languages: English, Malayalam, Hindi
